“Driven software developer dedicated to creating innovative solutions and delivering high-quality code.”

Personal Profile

Enthusiastic last year BSc student, with a versatile background in **web development**, now shifting gears toward **mobile app development**. Proficient in a diverse range of technologies, including **React, Django, NodeJS, Python** and now dedicated to mastering mobile development tools. My passion for learning fuels my journey into new technologies and programming languages. I bring a track record of successful independent work and collaboration within teams, always driven by a commitment to **deliver top-notch**, user-centric solutions. My strong **problem-solving and communication skills** have been honed through a series of projects that I've developed and delivered with excellence.

Currently seeking opportunities to apply my skills in the dynamic field of mobile app development, I'm equally adept at managing solo projects and thriving in collaborative team settings. My diverse background in both web and mobile development uniquely positions me to tackle multifaceted challenges in the software development domain.

Work Experience

OBSS

Ankara, Turkey

IOS Developer Intern

July 2023 - Aug 2023

- Collaborated with a dynamic team of fellow interns during a month-long internship program, which included a one-week intensive course followed by a three-week mobile app development contest
- Designed, developed, and launched a highly functional and user-friendly iOS mobile application within the contest's strict timeline..
- Demonstrated exceptional skills and creativity by winning the mobile app development contest, showcasing expertise in iOS app development..
- **Technical Skills:** UIKit, Swift, Interface Builder, CoreData, Alamofire, MVC, Kingfisher
- **Soft Skills:** Time Management, Communication, Presentation skills.

Education

Gazi University

Ankara, Turkey

BSc in Computer Engineering

Sept 2019 - Current

- GPA: 3.73

Projects

Mobile Applicaton

Moviebase

June 2021 - February 2022

- **Moviebase**, developed as an internship project, emerged victorious in a contest of innovation and creativity. This app empowers users to effortlessly create custom movie lists using **CoreData** for data management, **Alamofire** for networking, and **Kingfisher** for image caching. Its sleek UI is built on **Swift and UIKit**, ensuring a smooth and delightful experience for movie enthusiasts.

Moviote

Mobile Application

July 2022 - February 2023

- **Moviote** is a dynamic and engaging mobile application that allows users to create and curate their own movie lists, rate movies, and socialize with other users through community features. Developed using the latest technologies, including **Flutter** and **Cubit** state management, the app is **designed for optimal performance and scalability**. The project utilized **MongoDB** for its robust and reliable database capabilities, and **Django** for its powerful backend server. Throughout the development process, we prioritized code **readability and re-usability**, resulting in a **well-organized and easily maintainable codebase**.

Compensation Calculator

Web Application

April 2022 - May 2022

- Compensation Calculator - A powerful web application designed for employment law attorneys to quickly and accurately calculate compensation for their clients. Developed using **React** for the front-end and **Django** for the back-end, the app features an intuitive user interface that simplifies the complex calculations required by employment law. Key features include a **custom middleware** for secure **one-on-one login**, the ability to generate reports in PDF/DOCX formats, and seamless integration with existing legal resources and legislation databases. The app also utilizes **AJAX** for fast and responsive HTTP requests.
